

# The FALCATA

Ergonomics at the service of funeral professionals

The FALCATA is a height-adjustable catafalque with electric assistance that can be tilted, raised and lowered.

The Falcata allows the coffin to be tilted in the burial chamber for a more beautiful presentation of the deceased.

Due to its variable height, the FALCATA requires only one operator to load or remove the coffins from the hearses.

# Product

The FALCATA is made of beech wood from French forests.

## Characteristics:

Width 510mm x length 1710mm

Minimum height: 570mm      Maximum height: 1000mm

Lithium battery (with a capacity equivalent to forty ascents and descents)

Remote control included.

4 Castors ø 125mm (2 with brakes)

Weight 82kg

Maximum load: 500kg

# The advantages

## Ergonomics

Effortless handling and suitable for all types of vehicles.

## Aesthetics

The FALCATA offers an aesthetic advantage during coffin presentations.

## Only one operator is needed

No more need for 3 or 4 people to take coffins in and out of hearses.
